

Birthing Room Applications

Lighting Leadership in the LDR

The Most Widely Used Birthing Light in America

Skytron Mini Argos

The Skytron Mini Argos System is the most widely used birthing room light in America. With literally thousands of lights in use, the HA60AR is definitely the lighting system of choice for LDR and LDRP applications.

Charging Base with Strobe-Guided Remote Control

Mini Argos Lighting features include:

- An Attractive, Homey Atmosphere
- Surgical Quality Illumination
- Exclusive Strobe-Guided Lighting Control... providing a "Light in Your Hand"
- Instant Practitioner Target Accuracy via Remote Control Wand
- Up to 6,500 fc (70,000 lux) from Two (2) Overlapping Light Sources
- High Quality, High Intensity Lighting for repair of Vaginal Tears & Episiotomies
- Wide Angle Reflector Design
- Equipped with Standard Wall Control (WC) for Intensity Adjustment and Auxiliary Touchpad Directional Controls

HA60AR-WC Wall Control features Intensity Adjustment and Auxiliary Touchpad Directional Controls

Alternative Recessed Lighting and Exam Lighting

The EX100 Series

The EX100 Series Lighting System can also be used as a lower-cost alternative to the Mini Argos. The Dual EX100 System also provides excellent illumination for birthing applications, providing an infinite range of Intensity Settings via a Wall Intensity Control, combination A/B Toggle Switch and Joy Stick Control for movement of each Lighthead.

- Surgical Quality Illumination up to 8,000 fc (86,000 lux) without Glare, from Two (2) Overlapping Light Sources
- Excellent Lighting Control provided user “Line-of-Site” is maintained with respect to Wall Control and Lightheads for Light Beam positioning

EX100 Series Wall Control featuring On/Off and Intensity Controls, Combination A/B Toggle Switch with Joy Stick Controller

The ST9 Series

ST9S Portable Stand

Skytron's Advanced ST9 Series Exam Light incorporates many of the features of our leading Stellar Major Surgical Lights, including State-Of-The-Art higher intensity, non-glare optics. Lighthead construction consists of a new, radically durable and featherlight polymer material for optimum performance, maneuverability and durability.

Key Features

- High Intensity Lighting of 4,250 fc (45,730 lux)
- Soft White Anti-glare Optics
- Radically Durable, Featherlight Polymer Construction for Optimum Maneuverability and Durability
- Available as Portable Stand, Ceiling Mount or Wall Mount
